DAIRY PRODUCTS

Idaho's potato production is expected to total 117 million cwt, down 11 percent from last year's 132 million cwt. This is Idaho's smallest production total since 1989. Planted acres of 325,000 and harvested acres of 323,000 are down 5,000 acres from previously set estimates and down 30,000 acres from 2004. This is the smallest potato acreage in Idaho since 1986. Statewide, yield is 362 cwt (field-run basis), down 12 cwt from last year's record high. Yield in the 10 Southwestern counties, at 465 cwt, is down 25 cwt from 2004. Total production in the area is down 20 percent from last year at 9.77 million cwt from 21,000 harvested acres. In Idaho's "other counties," yield is estimated at 355 cwt, compared to 365 cwt a year ago. Other area production from 302,000 harvested acres is expected to total 107 million cwt, 10 percent below last year's 120 million cwt.

Fall Potatoes – Production Forecast November 1, 2005

United States Potato Highlights

Nationally, production of fall potatoes for 2005 is forecast at 382 million cwt, down 7 percent from a year ago. Area harvested, at 951,800 acres, is down 7 percent from last year. The average yield for the fall crop is estimated at a record high 402 cwt per acre, 1 cwt above the previous high set last year.

Western States production is forecast at 268 million cwt, down 5 percent from last year. Acreage harvested, at 600,900 acres, decreased 6 percent from last year but the average yield of 445 cwt per acre is up 7 cwt from 2004. Growing conditions throughout the Western States were generally favorable. Idaho's total potato forecast, at 117 million cwt, is 11 percent below last year and the lowest since 1989. Yield in Washington is forecast at 620 cwt per acre, 30 cwt above last year. If realized, this will be a record high yield exceeding the previous record established in 2000 by 20 cwt. Production, at 95.5 million cwt, is 2 percent above last year. Colorado's production is expected to decrease 6 percent from 2004 but yields are up 15 cwt per acre. A long growing season and adequate irrigation water allowed potatoes to size larger. Oregon's production is forecast to be up 9 percent due to the record high yield of 584 cwt per acre, 41 cwt above the previous record established in 2000.

Central States production is forecast at 90.1 million cwt, down 11 percent from last year. Harvested area, estimated at 260,400 acres, is down 9 percent, while average yields, at 346 cwt per acre, are down 9 cwt from a year ago. Michigan, with production up 5 percent from last year, is the only State in the Central Region where an increase in production is expected. The other 5 States, when compared with last season, expect decreases in production ranging from 5 percent in Wisconsin to 23 percent in North Dakota. North Dakota's production decrease is due, in part, to a 19 percent reduction in harvested acres. Flooding in the major potato producing region caused growers to abandon more acreage than normal. Minnesota production is forecast 8 percent below last year.

Eastern States production is forecast at 24.5 million cwt, down 12 percent from last year. Area for harvest totaled 90,500 acres, 4 percent below last year, while the average yield, at 271 cwt per acre, is down 23 cwt from last season. Drought conditions during the summer in Maine, Massachusetts, and Rhode Island reduced yields. Heavy rains late in the season drowned out fields in low lying areas for all Eastern States. A 17 percent decrease in production is expected in Maine.

Sugarbeet Production

Idaho's sugarbeet production for 2005 is forecast at 4.69 million tons compared to 5.51 million tons a year ago. Yield of 28.1 tons per acre is down from last year's 28.7 tons. Harvested acres of 167,000 are down from 2004's 192,000 harvested acres.

Sugarbeet production for the U. S. is forecast at 27.3 million tons, down 9 percent from last year's production of 30.0 million tons. Area harvested, at 1.24 million acres, is down 5 percent from 2004. Yields are expected to average 22.0 tons per acre compared to 22.9 tons last year.

Mid-October Prices Received by Farmers

Preliminary indications of prices received by Idaho farmers for the month of October showed increases for feed barley, malt barley, potatoes, all wheat, all milk, calves, steers and heifers. Price declines were recorded for alfalfa hay, all barley, dry beans, beef cattle, and cows.

Nationally, the Preliminary All Farm Products Index of Prices Received in October, at 110, based on 1990-1992=100, is 7 points (6.0 percent) below the September Index. Producers received lower prices for broilers, corn, eggs, and soybeans. Higher prices were received for cattle, sweet corn, wheat, and turkeys.

Pea and Lentil Production

Idaho's dry edible pea production is estimated at 598 thousand cwt, a decrease of 36 percent from the 935 thousand cwt produced in 2004. Lentil production of 567 thousand cwt is also down from last year's 770 thousand cwt. Austrian winter pea production of 88 thousand cwt is down 48 percent from the 168 thousand cwt produced in 2004.

Nationally, dry edible pea production for the U. S. is expected to total 13.8 million cwt, up 21 percent from the 2004 estimate. Lentil production, at 5.10 million cwt is up 22 percent from 2004. Austrian winter pea production of 324 thousand cwt is up 11 percent from last year.

U.S. Dairy Products September 2005 Highlights

Total cheese output (excluding cottage cheese) was 742 million pounds, 3.9 percent above September 2004 but 1.6 percent below August 2005.

American type cheese production totaled 302 million pounds, 2.6 percent above September 2004 but 3.1 percent below August 2005.

Butter production was 101 million pounds in July, 7.2 percent above September 2004 and 10.3 percent above August 2005.

Frozen dessert: (comparisons with September 2004)

Ice Cream

Regular (hard) ---73.1 million gallons, up 3.3 percent.

Lowfat (total) ---32.5 million gallons, down 5.9 percent.

Nonfat (hard) ---1.49 million gallons, up 2.7 percent.

Sherbet (hard) ---4.99 million gallons, up 18.3 percent.

Frozen Yogurt (total)---5.15 million gallons, down 10.4 percent.

Nonfat dry milk for human food: (compared with September 2004) ---71.2 million pounds, down 24.2 percent.
